SKILLS

Programming Languages Typescript | Javascript | C# | Python | Rust | Swift | Objective C | Shell Scripting (Bash)
Technologies React | React Native | .NET | Jest/XUnit/unittest | AWS S3/IoT/DocDB | MongoDB | iOS

EXPERIENCE

Hudl

Aug 2015 - July 2025

Omaha, NE

Full Stack Engineer

- Regularly touched the full stack: frontend, backend, databases, and cloud infrastructure, as well as mobile.
- Built a video exchange system to facilitate the sharing of game and practice footage between teams in a sports league.
- Developed a mobile interface allowing sports analysts to clip and organize video segments for review, empowering coaches with instant replay from multiple angles to support real-time decision-making.
- For a mobile app interfacing with a hardware device, implemented connection checks and recovery mechanisms to improve reliability over unstable connections, whether local (Wi-Fi) or remote (internet/cellular).
- Worked with an overseas team to establish backend requirements for provisioning hardware devices, wrote a design document for approval, and executed that design.
- Lead major version upgrades to outdated packages in our codebase. Strategized the tracking of completed work, code freeze timelines, major refactors, and regression testing.
- Encouraged best React/Typescript practices both in and outside the team through code review and knowledge sharing. Helped convert a mostly-javascript codebase to Typescript, and wrote ergonomic types to reduce friction in future work.

Healthcare Data Solutions

Aug 2014 - Aug 2015

Lincoln, NE

Software Engineer

- Researched Google's Polymer.js and designed a portal based on custom HTML components.
- Implemented a data aggregation service to enable speedier queries on a large collection of logs.
- Used Telerik Reporting to deliver UI-based reports for customer transactions.
- Leveraged jQuery and Kendo UI to create web pages.

Dell

May 2014 - Aug 2014

Lincoln, NE

.NET Developer

- Created data-driven webpages in VB.NET, MSSQL, JavaScript, HTML5, and ASP.NET MVC Framework.
- Implemented a Windows service with automated logging and email notifications.
- Used jQuery libraries and Ajax to build and update page elements.
- Provided statistics feedback with SQL Server Reporting Services.
- Wrote stored procedures in SQL and used them to access and update a database.

Raikes Design Studio

Aug 2013 - May 2014

Lincoln, NE

Software Developer

EDUCATION

Bachelor of Science - Computer Science

Jan 2012 - Dec 2014

Lincoln, NE

University of Nebraska-Lincoln

Associate's Degree - Electronic Imaging and Graphics

May 2009 - May 2011

Columbus, NE

Central Community College

FUN FACTS

Theatre

Major speaking/singing roles in high school and college plays and musicals.

Choir

Member of the general choir in high school and college as well as select vocal ensembles; the latter even sang at Carnegie Hall!
